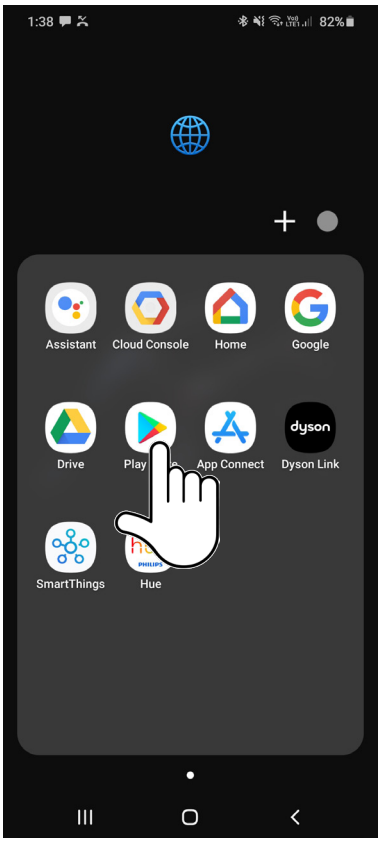
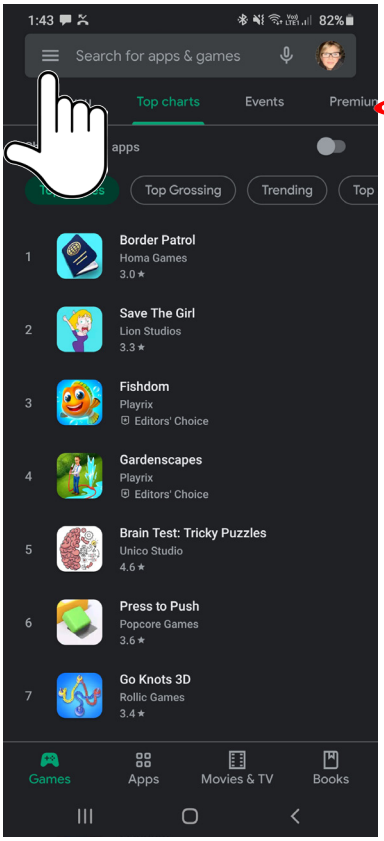
UPDATE RVMASTER ANDROID APP MANUALLY

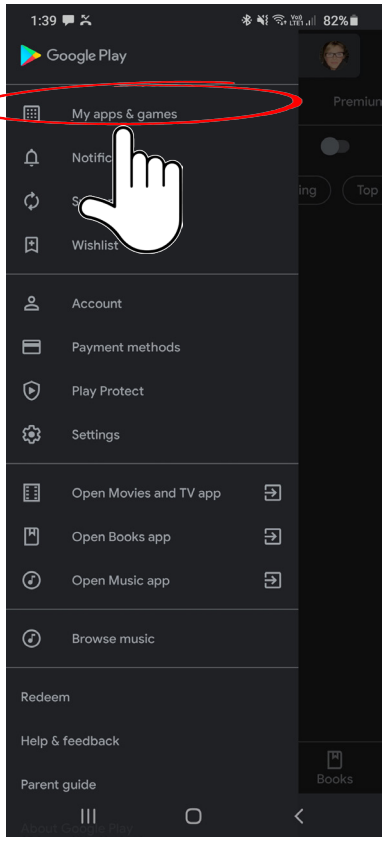
To update apps individually or in bulk using the Google Play Store app on your mobile device:



Open the Google Play Store app

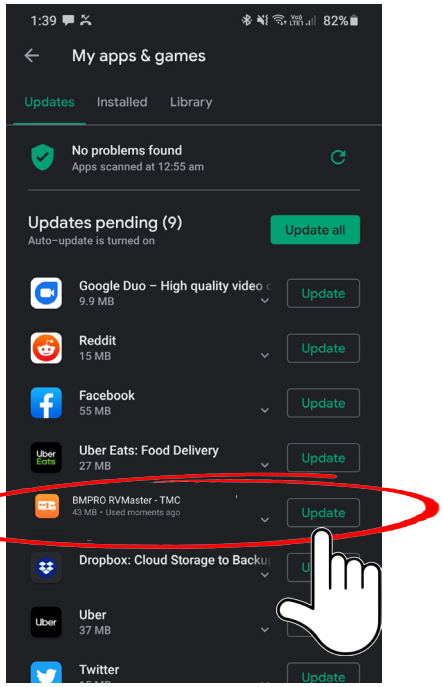


Tap Menu



Select my apps and games

If an update is available for the RVMaster it will be labeled "Update."



Tap Update

UPDATE ANDROID APPS AUTOMATICALLY

To automatically update apps on your Android device:

1. Open the Google Play Store app .
2. Tap Menu Settings.
3. Tap Auto-update apps.
4. Select an option:

- Over any network to update apps using either Wi-Fi or mobile data.
- Over Wi-Fi only to update apps only when connected to Wi-Fi.

Note: If an account on your device has a sign-in error, apps may not update automatically.

POWERING YOUR ADVENTURES

IOS: CHECKING IF YOU NEED ANY UPDATES

The simplest way to check if any of your apps have updates available is to check the App Store icon on your device. This looks like a blue tile bearing a white capital A made out of three lines. It also has App Store written underneath.

If the icon has a red circle with a number inside displayed in the upper-right corner, this means updates are ready to be installed. The number inside the circle denotes how many are available.

INSTALLING UPDATES

Tap the App Store icon to open the store itself.

The Account screen has a section headed Available Updates. You can choose to Update All or, if you're wary of bad or unnecessary updates, go through them one by one and read the details before hitting Update. Tap More for extra information.

SET UP AUTOMATIC UPDATES

We mentioned earlier that some updates aren't essential, and you may choose to operate a policy of checking every update before installing it. But it's a lot easier to simply tell your iDevice to install them all, as and when they become available.

Is this a good idea? Only you can decide. But the vast majority of app updates fall into three camps: important fixes that absolutely should be installed; free extra content that adds extra levels/options without affecting what you already had; and seemingly pointless updates that you don't even notice. And in all three cases you would not be adversely affected by turning on auto updates.

There will be the occasional evil update that wrecks a good app, but these are genuinely rare. The author of this article turned on auto updates several years ago and hasn't regretted it yet - but your mileage, as ever, may vary.

If you decide that this option is for you, go to Settings > iTunes & App Store, and make sure you're signed into your Apple ID. The second category, Automatic Downloads, lets you toggle on or off this feature for Music, Apps, Books and App Updates; we would recommend the last one only, but it's up to you.
