

BATTERYCHECK

BatteryCheck is BM PRO's innovative app-driven device that connects to a range of standard batteries and communicates wirelessly via Bluetooth with your smart phone to give you real-time data on the health of your battery. Instantly view volts and amps, time remaining, temperature, battery status, state of charge and battery health quickly and conveniently to maintain peak performance of your battery set-up, assuring you'll always have enough power to keep your adventures on track!

KEY FEATURES

-  Communicates with smartphones via Bluetooth
-  Free downloadable app via Google Play and iTunes App Store
-  Easy DIY installation – no mechanical expertise required
-  Works with batteries in parallel (7Ah-800Ah battery bank)
-  Internal shunt capacity - 80 amps continuous
-  Set automatic alarm warnings via the app
-  Compatible with any deep cycle 12 or 24V Lead Acid, AGM and Gel battery

SPECIFICATIONS

Voltage Measurement Range	8V to 30V
Current Measurement Range	+/- 100Amp
Temp Measurement Range	-20°C to 70°C (@ Battery Terminal)
Monitored Battery Capacity	7Ah to 800Ah
Input Voltage	8V to 30V
Quiescent Current Drain	< 10 mA
Dimensions	140mm x 65mm x 20mm
Weight	< 1kg

Note: The BatteryCheck is not suitable to be used with engine cranking applications of any type and is not designed for under vehicle bonnet use.
