

TRAILCHECK

POWERING YOUR ADVENTURES

TrailCheck is a wireless in-car monitor of towing safety equipment, which enables the status monitoring of both the TrailSafe, BM PRO's emergency trailer breakaway safety system and SwayControl, BM PRO's proactive electronic stability control (ESC) system

TrailCheck uses LED indicators to display the status of your towing system.

Mount TrailCheck so that it is visible to the driver and plug it into a 15A (or lower) fused vehicle 12VDC Outlet or Cigarette lighter. Then pair it with the TrailSafe and test it.

SPECIFICATIONS

Communications	Bluetooth Low Energy (BLE 5.0)
Operational Voltage	8 - 16V
Operational Temperature	0 - 50°C
Dimensions	92 x 52 x 25mm

KEY FEATURES

- Bluetooth connectivity.
