SMARTCONNECT SMART RV SOLUTIONS

PROPANE

TEMPERATURE

TIRES

RVMaster on board your RV gets even more versatile with SmartConnect. Add a range of Bluetooth sensors to your system to monitor your RV's temperature, tire pressure, propane gas levels and more, all from the same RVMaster app.

Monitor your remaining propane gas levels with the SmartSense. It simply attaches via magnet to the underside of your propane gas tank to provide an accurate reading of your remaining gas level, ensuring there's enough gas for your next adventure, no guess work required!

Want to understand if your fridge is staying cold in the hot weather? Install the SmartTemp device inside your fridge and know when to reach for a cold drink without even opening the fridge.

Tire pressure is critical to the safe towing of an RV. It needs to suit the load and ensure there are no slow leaks which can lead to a puncture. Install the SmartPressure TPMS system on your RV to enjoy for worry free travel.

SmartConnect brings a new level of integrated technology to your RV.
