

DIPPER

POWERING YOUR ADVENTURES

The Dipper is a digital water level indicator (sender) designed to be used in both plastic and metal water tanks. It gives an accurate reading of the water levels in fresh and grey water tanks on recreational vehicles, camper trailers and boats.

Dipper is easy to install into the side of your water tanks. Retrofitting is a DIY job thanks to the 5 pin connector located close to the ring terminal.

The Dipper has been designed for use with the suite of BM PRO power management systems (BatteryPlus35, J35) however is also compatible with a range of after-market tank level indicators.

SPECIFICATIONS

Ring Terminal	Stainless Steel 316 corrosive resistant properties
---------------	--

5 Pin Connector	Eliminates need to rewire if retrofitting
-----------------	--

Mounting Hole required	22mm
---------------------------	------

Waterproof connector	
-------------------------	--

KEY FEATURES
