

JCONTROL

POWERING YOUR ADVENTURES

JControl is a powerful new generation display specifically designed for Jayco's J35 Power Management System.

It allows you to take control and manage the state of your battery. It acts as a fuel gauge by monitoring and displaying information such as battery volts and amps, solar and AUX inputs, charge and discharge status, remaining battery capacity and water tank levels.

SPECIFICATIONS

| | |
|----------------------------|-----------------------------|
| Voltage Measurement Range | 8V to 15V |
| Monitored Battery Capacity | 7Ah to 600Ah |
| Visual Warning | 11.0V (Low Battery Voltage) |
| Water Tank Level | Measures 25% increments |
| Water Tank Monitoring | Dipper or Tank Bungs |
| Clock | 12hr (AM & PM) |
| Back light | Yes |
| Input Voltage | 8V to 15V |
| Input Current | <21mA |
| Fault Protection | Reversed Battery Protection |
| Operating Temperature | 0°C to 50°C |
| Dimensions | 156 x 94 x 22mm |
| Installation | Wall mounted |

KEY FEATURES

-  Displays Battery Volts and Amps
-  Charge and Discharge Status
-  Displays remaining time left in the battery
-  Water tank monitoring and pump on/off switch
-  Displays Solar current when paired with J35B
-  Clock
-  Low voltage warning
-  Displays AUX current
-  Displays in AC is connected
