

PROSMART

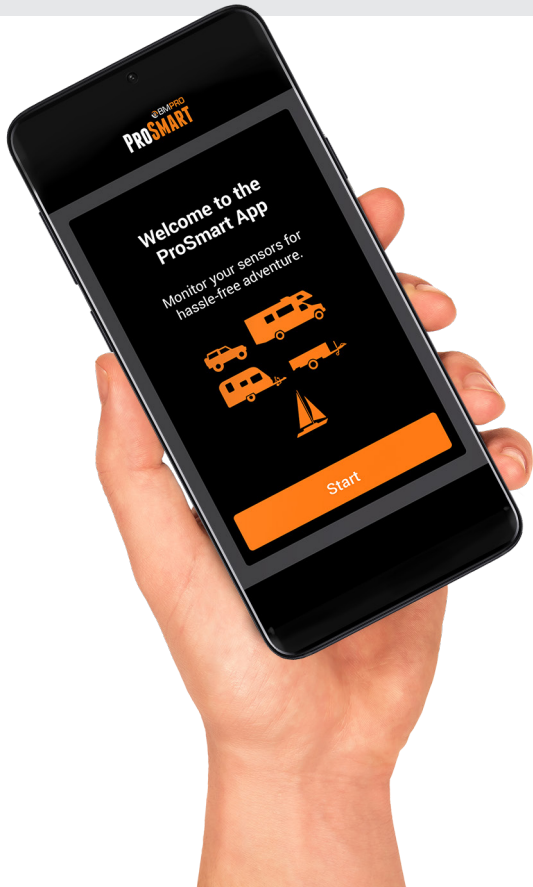

STARTER

POWERING YOUR ADVENTURES

ProSmart Starter is an entry level smart RV system that allows a greater number of travellers to improve the way they explore the great outdoors.

The system comes equipped with an app-based caravan battery monitor and provision to connect up to four water tanks.

Users can then build their own ProSmart system by adding additional Bluetooth sensors at a later stage, giving them a greater level of choice and freedom to decide which RV parameters they wish to monitor.

BUILD YOUR OWN SYSTEM
