

BATTERYCHARGE15 OVERVIEW

BMPRO's BatteryCharge15 is a high-performance charger designed for 12V batteries with different chemistries and sizes.

It features a 7-stage charging process that increases the battery's life and performance while protecting it from overcharging.

The BatteryCharge can be used as a power supply, and features a battery chemistry selector, a charge rate selector, and battery charge state LEDs that shows the charging progress.

The BatteryCharge is available in two models, the **BatteryCharge15** and the **BatteryCharge25** to suit your charging needs.

KEY FEATURES

- 7-stage charging process
- Battery chemistry selector
- Charge rate selector
- Battery charge state graph
- Can be used as a power supply
- Easy to use and install
- Increases battery life and performance
- Protects battery from overcharging
- BMPRO signature durability & ease of use
- 2 year warranty

BATTERYCHARGE15 SPECIFICATIONS

Input Voltage	240V, 50Hz
Input Power	270W
Nominal Output Voltage (Power Supply Mode)	13.6V
Output Current (Power Supply Mode)	10A
Minimum Start Voltage	8V
Charging Current	2/10/15A
Back Drain	<4mA
