

DIPPER OVERVIEW

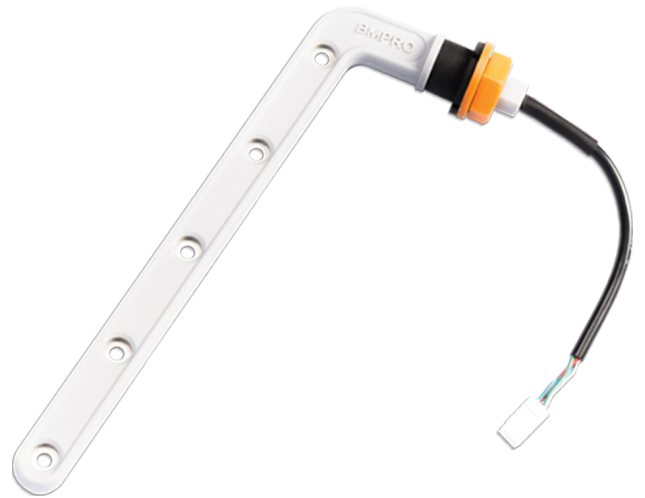

BMPRO's Dipper is a digital water level indicator designed for use in both plastic and metal water tanks.

The Dipper provides accurate readings of water levels in fresh and grey water tanks on recreational vehicles, camper trailers, and boats.

The Dipper is easy to install and retrofitting is a DIY job thanks to the 5-pin connector located close to the ring terminal.

It has been designed for use with BMPRO power management systems but is also compatible with a range of aftermarket tank level indicators.

The Dipper is available in 2.5M, 5M, and 7.5M cable lengths.

KEY FEATURES

- Easy to install
- Fits existing water tanks
- Compatible with BMPRO ProSmart, ASPero, Odyssey, JHub, Trek, RVView, JControl and Drifter systems
- Works with plastic and metal water tanks
- Range of sizes
- BMPRO signature durability & ease of use
