

# JCONTROL OVERVIEW

BMPRO's JControl is a wall-mounted battery monitor designed specifically to operate with BMPRO's J35 series of battery management systems.

The JControl provides vital data at a glance, including caravan battery voltage, battery current, battery capacity and remaining time before the battery is completely discharged.

The JControl also enables monitoring of water levels of up to 4 connected water tanks and control of a water pump, all from a sleek, wall-mounted display.

## KEY FEATURES

- Monitor battery voltage
- Monitor battery current
- Monitor battery capacity
- Monitor time remaining before complete discharge
- Monitor AC mains
- Water tank display
- Water pump control
- Configurable settings
- Lithium-compatible
- BMPRO signature durability & ease of use
- 2 year warranty

## JCONTROL SPECIFICATIONS

Input Voltage Range	8-15V
Battery Drain	< 21mA with backlight off
Ambient Temperature	0-50°C
Dimensions	164mm x 95mm x 22mm
