

JHUB OVERVIEW

BMPRO's JHub tablet is an in-built app-driven battery monitor and control hub designed to operate with BMPRO's J35 power management system via the ControlNode103.

The JHub provides information about the caravan's battery system, including battery status, power consumption and available charge sources, and allows you control caravan features such as lights, hot water, slide-outs and water pumps, and lets you monitor clean and dirty water tanks, caravan temperature.

The JHub is SmartConnect ready, allowing you to pair SmartConnect sensors so you can remotely control various aspects of your caravan.

KEY FEATURES
