

ProSmart INSTALL GUIDE

ProSmart is a sensor monitor with an app to easily track multiple sensors and parameters on your adventure, whether you travel by an RV, a boat, a 4WD or an overland vehicle, giving you a wealth of information for comfort and safe travels. Monitor water levels in your fresh or grey water tanks, gas levels in your BBQ / propane bottles, tyre pressure (TPMS), temperatures in the fridge, freezer or inside your vehicle, as well as your 12V battery charge, all from an easy-to-use app on your smartphone.

1. OVERVIEW

2. DESCRIPTION OF PARTS

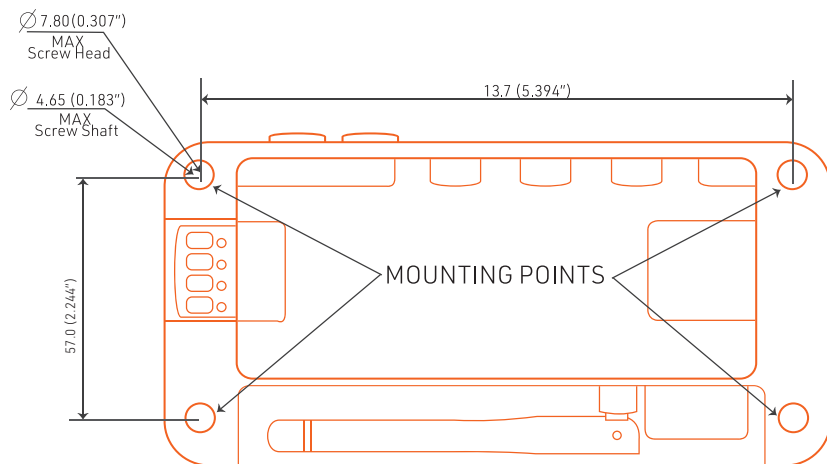

3. MOUNTING

To mount the SmartLink:

1. Create openings for cable connections if necessary.
2. Mount the SmartLink to the wall with screws.
3. Make all connections.

For caravan/RV installations, mount it at a high point to avoid the metal chassis and tow bars, which can cause signal interference.

To ensure optimal antenna performance, avoid placing the SmartLink near conductive or metal objects.

4. APP

Use the QR code to download the ProSmart app.

5. PAIRING

When opening the ProSmart app for the first time, you will need to pair the SmartLink.
From the Welcome screen:

1. Press Start.
2. Press Continue.
3. If required, allow access to your device's location.
4. Once the Pair your SmartLink screen displays, press the pairing button on the SmartLink.

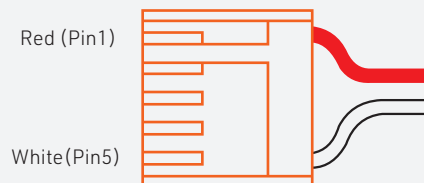

6. LED STATUS INDICATOR

STATE	LED STATUS
Initialisation	Flashing white and yellow
Pairing	Flashing Blue
The maximum of four mobile devices has been reached	Flashing Amber-Green
All mobile devices have been forgotten	Single Red flash

7. ANALOG WATER DIPPERS

To connect an analogue dipper to your SmartLink:

1. At the top of the SmartLink, move pin 2 to the off position on the red dip switch.
2. On the bung wiring loom, connect the red wire to pin 1 of the SmartLink's water tank sensor connection.
3. Connect the white earth wire at the bottom of the tank to pin 5 of the SmartLink's water tank sensor connection.
4. Follow the analogue dipper's instructions to connect it to the water tank.
