

SWAYCONTROL OVERVIEW

BMPRO's SwayControl is a proactive electronic stability control that automatically stabilises a caravan/trailer in the event of a sway.

Caravan/trailer sway, which can be caused by changing road conditions, driver error, lateral winds or a passing truck, is automatically corrected, keeping you safe on the road.

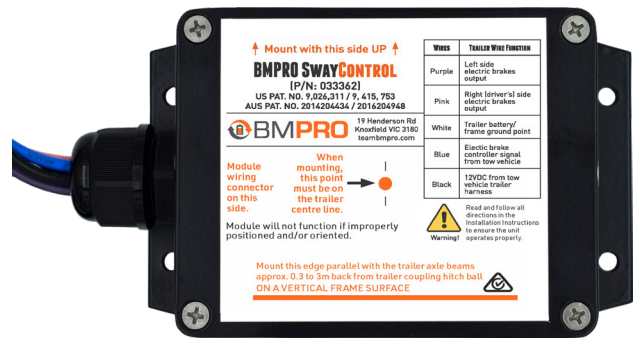

The SwayControl is connected directly to the trailer braking system and continuously monitors the caravan/trailer for signs of sway.

The SwayControl distinguishes between safe maneuvering and dangerous trailer sway and does not require driver intervention.

The SwayControl quickly and effectively applies the necessary braking force to both sides of the brakes independently and proportionately to correct sway, preventing the sway from getting worse and potentially causing a jackknife or rollover.

KEY FEATURES

- ▣ Independent control of left and right-hand side trailer brakes
- ▣ Continual closed loop feedback
- ▣ Automatic system disabling in off-road conditions
- ▣ Easy to install
- ▣ "Sleep mode" to conserve battery
- ▣ Fully sealed
- ▣ Waterproof
- ▣ 100% tested for reliability
- ▣ BMPRO BatteryPlus35-II and J35 compatible
- ▣ 2 year warranty

SWAYCONTROL SPECIFICATIONS

System Voltage	12 - 15V
Power Source	Caravan/trailer house battery
Current Draw (Sleep Mode)	35mA ± 2%
Sleep Mode	After 30 minutes of inactivity
Current Draw (Sleep Mode)	35mA ± 2%
Wake-up Mode	Brake controller signal
Preprogramming	No
Auto System Disable (ASD)	Yes
Off-road deactivation	Automatic
Braking Level Adjustment	Automatic
Braking Levels	Independent left/right
Maintenance	None
Status Indicator	LED
Dimensions	146mm x 89mm x 55mm
