

TRAILCHECK OVERVIEW

BMPRO's TrailCheck is a wireless in-car monitor that allows you to monitor BMPRO's TrailSafe, an emergency trailer breakaway safety system, and, if installed, BMPRO's SwayControl, a proactive electronic stability control system.

The TrailCheck displays the status of the TrailSafe and SwayControl using multicoloured LED indicators.

The TrailSafe connects to the TrailSafe via Bluetooth. It can be mounted near the driver with Velcro strips.

KEY FEATURES

- ▶ Bluetooth connectivity
- ▶ LED status indicators for full-system safety check
- ▶ If paired with a SwayControl-connected TrailSafe+, forms the TowControl, an integrated towing safety system with in-car reporting
- ▶ BMPRO signature durability & ease of use
- ▶ 2 year warranty
