

TREK3 OVERVIEW

BM PRO's Trek3 is a wall-mounted smart battery monitor designed specifically to operate with BM PRO's BatteryPlus35-II series of battery management systems.

The Trek3 provides vital data at a glance, including caravan battery voltage, charging and discharging current, capacity indication and remaining time before the battery is completely discharged.

The Trek3 also enables monitoring of water levels of up to four tanks and control of two water pumps, all from a sleek, wall-mounted display.

When connected to the included OdysseyLink104, it becomes part of the Odyssey system, allowing you to remotely monitor your battery and control your caravan's water pumps from your smartphone using BM PRO's free Odyssey App.

KEY FEATURES

- ▣ Integrated into Odyssey system
- ▣ Caravan battery voltage display
- ▣ Charging/discharging current display
- ▣ Shows indication of battery's remaining charge and time remaining before complete discharge
- ▣ Battery alarm
- ▣ Configurable battery capacity and battery chemistry
- ▣ Water tank level display
- ▣ Support for BM PRO's Dipper tank water level indicator
- ▣ BM PRO signature durability & ease of use
- ▣ 2 year warranty

TREK3 SPECIFICATIONS

Input Voltage Range	8-15V
Battery Drain	<21mA with backlight off
Ambient Temperature	0 - 50°C
Dimensions	164mm x 108mm x 22mm
